ALKALINE WATER STICKS PH LEVELS > 9.5

We are proud to offer Alkaline Water Stick, which is widely used to control and regulate the pH level in the fluids (7.5 to 9.5 levels) without using electric power. Offering innumerable health benefits, the Alkaline Water Sticks helps in neutralizing acidity and other toxins. Equipped with latest technology and purification medium, the Alkaline Water Stick provided by us has helped us to carve niche for themselves in the markets across the globe.

Alkaline Water Stick contains tourmaline ceramics, water soluble calcium carbonate, coral fossil, dechlorine ceramics and black stone. These materials make water healthy and tasty.

Water is essential to human being. But now water contains chlorine, heavy metal and it is far from tasty water. That is why we have developed Alkaline Ion Water Stick. Alkaline Ion Water Stick changes normal drink water into healthy and tasty water.

Alkaline Ion Water Stick contains natural ores and these ingredients are dissolved out into water. These ores decompose and remove chlorine and other unpleasant odours as well as alkalinize water.

This Alkaline water stick changes bottled or tap water into ionized water on the go!

Put it into water and shake it for 30 seconds, the PH will become 7.5-9.5 and ORP is -100 to -150. Don't keep it in water for a long time or overnight, otherwise the action is too stronger and don't taste good.

Also known as the diet water stick or diet ion stick!

It can even help you lose weight when you drink sufficient quantities!

The Ti stick changes any water into High pH Antioxidant Micro Clustered water!

BENIFITS OF A ALKALINE WATER STICK:

1. It can raise pH to 9 or higher
2. Alkaline water can increase the body's immune system to restore to prevent various diseases
3. Change the common water into alkaline water, which is rich in mineral element, such as Ca, Ma, K and Na.
4. Detoxicate the alcohol & tobacco.
5. Removes Chlorine and Heavy metals
6. Hydrate and detoxify deeply,
7. Slow down aging, increase energy
8. Water rich in Antioxidants, Ionizer Minerals and Negative Ions
9. Great for everyday use and traveling
10. Most important... scavenge up free radicals
11. Boost mental Clarity
12. Strong solubility, and long- terms drinking can prevent the renal calculus.
13. Neutralize the acidic toxin in the bowels, eliminate the dysporia. Cure acidosis, rectify the acidic constitution.
14. This product decrease the size of water molecule clusters and there by controls harmful active oxygen and improves nutrient absorption to enhance overall health.
15. Promote weight loss when you drink sufficient quantities

HOW TO USE:

1. Before using, put the stick in a clean bottle filled half-way with tap or bottle water (if bottled, preferably one with a 7 pH or higher). (If stick is covered with plastic wrapper, please remove) Shake vigorously for 30 seconds and dispose. This removes excess loose minerals. Repeat 2 more times.

2. Fill the bottle again with water shake vigorously for 30 seconds and wait 15-20 minutes before drinking.

The longer the water sits with the ionic stick submerged, the stronger the ionization and the higher the pH (up to pH 9.5) Also a strong negative charge (ORP) is attained.

If it tastes too strong, dilute it a bit with additional source water.

3. Use one stick for a 16 oz bottle (500ml). Use two sticks for a quart (1 liter) bottle, or more sticks for faster, stronger ionized drinking water.

4. Ti Stick only - pour half of green packet into bottle. Shake vigorously for 30 seconds and empty water and continue to step # 1 and 2 before use.

5. Best to drink freshly made ionized water and drink often!

*Quickly absorbs and decomposes chlorine, heavy metals and other impurities!

LIFE SPAN:

One stick can filter 2000L water. If one person drinks 3L water per day, life span is about 666 days. *Sticks are no longer active when chlorine taste and/or smell are present.

Time to use new Ti Stick now!

There are many reports which show how alkaline ion water for human body. It is said that alkaline ion water has the following effect

1. Comparing to usual tap water, ionized water easily dissolve calcium, magnesium, potassium, sodium and so on. Also ionized water is efficiently absorbed into the human body.
2. Alkaline ion water works for preventing following symptoms Excess stomach acid, chronic diarrhea, poor digestion, and abnormal gastrointestinal fermentation and so on. Also it promotes cells metabolism and bodily wastes are discharged from the human body by its diuretic action.
3. Human body fluids are normally mildly alkaline constitution. pH is normally from 7.35*7.45. To eat too much meat or sugar turns blood from alkaline to acidic. To maintain alkaline constitution, it is very effective to eat vegetables and seaweeds. Also, keep drinking alkaline ion water contribution to change acidic to change constitution into mildly alkaline constitution.
4. Alkaline ion waters molecular are small and pH is 7.5-8.6. ORP is also low and water with low ORP can store energy.
5. pH of alkaline ion water with Alkaline Ion Water Stick do not change if it is left for long time. If you want to test this, please prepare a glass of alkaline Ion Water Sticks water and a glass of electrolyzed alkaline water. Please put pH test reagent into both glasses and leave them for 2-3 days. Colours of both glasses of water turn into blue. After 2-3 days, you will find colour of electrolyzed water change into green, but this is not of water of Alkaline Ion Water Stick. This means only electrolyzed water changed into neutral water.
